DD:

Overall impression now and future needs:

Patient was reviewed today in my clinic, and his injury condition has stabilized and has become final in nature and character, as a result of the traffic accident that the patient experienced on the aforementioned date and we state the following:

Investigations

1. He is suffering pain, walking with lameness and the inability to run, pain when prolonged standing and walking, inability to jump and sit in a squatting position, difficulty climbs and descending stairs, and cannot carrying weights on the right hand, also he is suffering from limited movement

Diagnosis

Checked by Hamid Maqsood

Assistant Director (Cms-IV)

2. He still has pain with difficulty doing his routine daily activity.

3. Patient has required physical therapy for minimum 6 months.

4. Avoid weight bearing, aggressive movements, lifting heavy objects and or to do sportive activity

5. According to the current situation, in consideration of the above finding his disability considered as 55% from the power of his left lower extremity, 30% from the power of his right upper extremity, and disability of the skin can be calculated as 5% of the total skin.

6. Patient is unable to go back to his work.
